[Accept](#) [Decline](#)

On April 16, 2025, SentinelOne issued an official company statement in response to an Executive Order focused on Chris Krebs in his prior role as Director of the Cybersecurity and Infrastructure Security Agency. We are updating that statement to reflect a personal decision communicated by Chris on April 16th as well as a response from our CEO Tomer Weingarten. The following emails were sent to all SentinelOne employees.

Reply-To:

To: Everyone ST

Dear Sentinels:

It's with a heavy heart that I'm announcing I'll be stepping away from SentinelOne, effective immediately. I want to be clear: this is my decision, and mine alone.

As many of you know, when the news broke last week about the Executive Order — one that directly named me and referenced SentinelOne — I immediately reached out to Tomer. I told him what I firmly believe: this is my fight, not the company's, and I offered my resignation.

For those who know me, you know I don't shy away from tough fights. But I also know this is one I need to take on fully — outside of SentinelOne. This will require my complete focus and energy. It's a fight for democracy, for freedom of speech, and for the rule of law. I'm prepared to give it everything I've got.

I want to express deep gratitude to SentinelOne, who took a chance on me and the PinnacleOne team, and who has shown nothing but vision, grace, and integrity — especially over the last week. The values and leadership I've witnessed from the leadership team and the board are something people spend entire careers searching for. Paired with SentinelOne's vision and potential, what you're building is truly unparalleled in this industry. The world will soon know what I've seen firsthand — this team is redefining what's possible in cybersecurity.

To the exceptional leadership I've had the privilege of working with — your guidance made me and my team better every single day. This was one of the most impressive C-Suites I've ever worked with, and I have no doubt that PinnacleOne and the broader team will continue to thrive under your leadership. To my longtime partner and friend, Alex Stamos — I couldn't have done any of this without you. I'll deeply miss working with all of you.

To the PinnacleOne team — I've never been part of a more intelligent, driven, and fun group. Since 2021, our time together has been the highlight of my professional career. Most people go their entire lives without working alongside talent like this. The mission of P1 is both rare and essential, and every shift in the geopolitical landscape only reinforces the strength of the model. I'm excited to watch you grow and evolve in the years to come.

To my fellow Sentinels, if you were at SKO in 2022 during the invasion of Ukraine... at OneCon23 when we launched PinnacleOne... at OneCon24 when we tackled the new era of destructive cyberattacks... or at SKO in 2025 when I spoke about Zero Days... Then what I'm about to say won't surprise you. Never forget why you're here, and how important your work is.

Cybersecurity is national security. SentinelOne is at the forefront of that mission — every day. You are on the frontlines, protecting millions who rely on us. The world is becoming more connected, and the stakes are

face this. Internalize it. Think ahead. Where will the world be in two years? Five years? No one can be sure, but I am sure of one thing: SentinelOne will be there — facing forward, adapting fast, and the adversaries that threaten our way of life.

We have the best platform out there and a roadmap most haven't even imagined. Keep pushing boundaries. Keep innovating. Move faster, and with fearless conviction. And above all — never forget who you are. Never forget what's right, and what you stand for. Sometimes doing the right thing is the hardest thing. Sometimes, it's the easiest.

As for me — don't worry. I'm right where I need to be. And to quote the great Kevin Kinney of Drivin N Cryin: "Everything's gonna be alright..." This isn't goodbye forever — just for now. We'll find our way back to each other.

Chris

Chris Krebs
Chief Intelligence & Public
Policy Officer

Tomer Weingarten
Re I-To

Wed, Apr 16, 2025 at 4:11 PM

Dear Sentinels:

I know I speak on behalf of all of us when I say thank you to Chris for his transparency and integrity — especially in this difficult moment. It reflects the values he has always brought to SentinelOne and to the people around him. His leadership made a lasting impact on SentinelOne, PinnacleOne, and the broader cybersecurity community. He helped shape important conversations and strengthened public-private collaboration. The work he led — especially in service of democratic institutions and critical infrastructure — is foundational and will continue to shape our impact moving forward. I know he'll take on this next chapter with the same clarity, conviction, and humility that defined his time here, and he carries our full respect with him as his journey continues.

SentinelOne has always been mission-focused — proud to support the United States and our global allies in the fight against nation state and cybercrime adversaries on the frontlines. We've built enduring partnerships with the public and private sector to share our threat intelligence, research, and advanced technology to help protect our critical infrastructure, government institutions, businesses, and citizens. Our team remains unwavering in our commitment to be a force for good — in this industry and in the world.

Chris, I wish you and your family strength, resolve, and purpose on the road ahead.

Tomer.

We at SentinelOne, a cybersecurity company – our mission is to defend customers, enterprises, and governments against cyber threats by harnessing the power of Artificial Intelligence. We view the White House as a crucial collaborator on that mission, and we will continue to support a strong America at a time of heightened geopolitical threats. Our team’s focus remains on being a

force for good in this industry and the world. We will continue to nurture our partnerships in the U.S. government, military, and intelligence community and collaborate in our shared mission to defend U.S. critical infrastructure in cyberspace as we always have.

In regard to the Executive Order dated April 9, 2025 focused on Chris Krebs in his prior role as a government employee, we will actively cooperate in any review of security clearances held by any of our personnel – currently less than 10 employees overall and only where required by existing government processes and procedures to secure government systems. Accordingly, we do not expect this to materially impact our business in any way.
